Adjustable Camera Tilt Option for Model J197 ShadowGage Sorters

The Camera Tilt Option permits adjustment of the camera angle to eliminate the parallax distortion caused by parts that have different diameters at each end, thus providing for accurate measurement of such parts.

- ✓ **±12° Adjustable Camera Angle**
- ✓ **Eliminates Parallax Distortion**
- ✓ **Versatility for Different Parts**
- ✓ **Accurate Measurements**
- ✓ **Fast and Easy Setup**

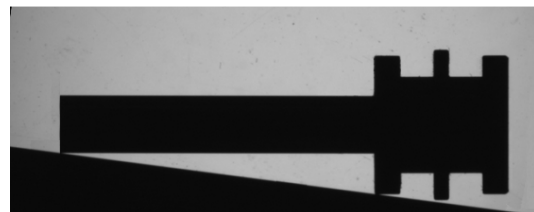

Model J197 with Camera Tilt Option

Typical Parts with Different Diameters at each end

Rounded Edges due to Parallax Distortion

Parallax Corrected by Tilting the Camera

A Unique and Valuable QC Tool for Manufacturers of Precision Parts
