Attn: Mr. Bob Schulkin
Mr. Ed Schulkin

January 28, 2004

Dear Mr. Schulkin

I have had the pleasure of knowing you and your company for the past four years, we have developed a new technology for Sika Corporation, which was cheaper, faster and more accurate than any other technology proposal submitted by all Sika companies worldwide. Not only were you personally integral to the new technology, but you were able to make it a reality through prototype development and final full scale turn key implementation.

Our project is a real success and we have received acclaim for this technology from around the world.

It has been a pleasure working with you and your company and I look forward to new ventures utilizing your technological strengths in vision, measurement and transport.

Sincerely,

Joe A. Abrantes
Process Engineer
