

Frequency Electronics, Inc.

June 18, 2002

Mr. Bob Schulkin
Resec Systems, Inc.
93-A South Railroad Avenue
Bergenfield, NJ 07621

Dear Bob:

We have been using your J-152 Digital Video Processor and Optical Bench for measuring diameters of metal deposits in our glass bulbs with great success for nearly one year. We especially appreciate your technical assistance from conceptualization to delivery of the system. The processor was delivered ahead of schedule, and has worked flawlessly from the first day to the present. You helped us solve a very critical problem in our production process with a very user-friendly and reliable machine.

We would strongly recommend Resec Systems, Inc. to any company that needs a video based inspection system.

Sincerely,

Csaba Szekely
Director, Physics Laboratories
Frequency Electronics, Inc
